**Handyman &  
Technical Service**  
Reg. PA184362

---

**There's plenty for all of us to do today, and I want to help you DO IT! I have three types of service: tech repair and consulting, and handyman labor. Read on for my background in each...**

## **TECHNICAL CONSULTING:**

I've serviced PCs and their components in general since 2000. I can help you use your desktop PC, laptop, or android phone more effectively. I do work with Apple devices, but they're not my native brand. While I do have happy Apple customers, I want to be fully transparent here!

I've helped people solve other more advanced problems for home offices and small businesses like:

- finding archiving and digitization solutions
- building new custom desktop computers to specification from purchased components
- consulting and pricing for equipment replacement
- data migration for home office & small businesses

Maybe you need a grip over your phone, or your social media. Or what all those monthly services are, and which ones you REALLY need.

Maybe you're curious about the cutting edge stuff, like how AI can help you or your small business, in educating you or helping you organize.

## **WINTER 2024**

Hello to my Pike County neighbors and surrounding friends!

I've been back in the area for a whole year already. As many of you know, I took on enough work by April to invest in myself here and make some things official. I'm now registered with the Commonwealth of PA as a general contractor. For work that requires multiple days or purchased parts, you'll have estimates and sign-offs. As a registered handyman, my work is also insured.

BonCal tech work is now rolled into our updated sheet, which shows per hour costs for white- and blue- collar services. **Legacy hosting customers (pre-2020 ONLY): hosting & tech associated with hosting ONLY are now locked in place until 2025.**

---

## **HANDYMAN:**

When I left Louisville, I left behind 30 hours a week serving as an Air Ramp Agent for FedEx. I was certified in operations like weight and balance engineering, load balancing, and aircraft door/fuselage inspection. I was certified in use & operational maintenance of everything we needed to load two types of aircraft.

Prior to that, I worked line and automation supervision at the UPS Worldport (Louisville) and UPS Philadelphia hubs. We're far from an Airhub here in Dingman Township, but I found out quickly when I moved back to Pike County: it's hard to find good work fast! I had to load many, many pods and moving truck loads as a new dad.

I decided to fill my former applied labor hours where I knew reliable help was needed: right here!

Minor repairs, yardwork, household appliance setup and basic instruction, furniture assembly, help moving, hanging wall mounts or pictures. I won't take on what I can't handle.

## TECHNICAL CONSULTING

### ONE-TIME CALLS

**\$75** FOR AN INITIAL HOUR

**\$60** FOR EVERY HOUR THEREAFTER

- PC REPAIR (Hardware replacement or cleanup)
- ANDROID HELP\*
- WINDOWS DEVICE CLEANUP
- UPDATES, DATA MIGRATION

*\*(sorry: no physical phone/tablet repairs.)*

### ONGOING TECH ADVOCACY

#### HOME/OFFICE TECH CONSULTING

When the internet-of-things made everything smart, things were supposed to get easier, right? Don't feel bad if they haven't. Things are moving fast, and it's not easy to know what you need.

I've had customers that don't know who they're paying or why they're paying them for tech services they've never used. Monthly bills for a box in an attic or basement with a blinking light--not properly connected to any device in the house--yet with a bill being paid every month.

When's the last time you've done an app audit?

When you buy a new phone, a new tablet, or a new computer--do you feel overwhelming dread?

Some people have a knack. Some people have a nephew. For everyone else, I can offer whatever help you need.

**\$40-100** AN HOUR\*

**dependent on on-site time requirements, distance, project type, and number of hours. Rates are negotiable, this sales card wishes to leave no surprise to the consumer.**

*\*(except Comm. AI training / prompt engineering)*

#### AI COMMUNICATION AND EDUCATION

##### WEB SELF-EDUCATION THROUGH AI

Turbocharge your production and education through careful application of AI and AI tools.

**\$0** FOR CONSULTATIONS

**\$90** AN HOUR (personal)

**\$150** AN HOUR (commercial)

## HANDYMAN

### ONE-TIME CALLS

**\$75** FOR AN INITIAL HOUR

**\$30** FOR EVERY HOUR THEREAFTER

A single hour will typically cover hanging a television, straightforward furniture assembly, appliance setup and instruction. I will give you a verbal estimate for any one-time or day work.

**\$20+** STANDING "SHOVEL&SALT" (boro and nearby me)

A winter special. \$20 is for a simple walk and one-car slip, prices assessed by job. You give me a time to have it cleared by, and I'll let you know if I can have your back (I've not found a way to bilocate yet). Once you're in, you're in--watch the sky and let me know when you want me. I'm on the hill! Sometimes we get flurries the boro folks don't, so you have to communicate with me. If you're locked in, I'm on call **for our agreed upon time!**

#### PROJECT AND ONGOING WORK

Anything more in-depth (longer projects and ongoing contracts) will have written estimates good for 60 days to the agreed start of work.

For estimated projects requiring materials, a material list will be provided, and a down payment up to the Commonwealth limit may be applied at the contractor's discretion. All receipts for materials will be provided. Unused materials will be given to the client or discarded as requested, but the client will not be refunded for unused materials authorized in the purchase list.

#### PLANNING

**\$0** FOR ON-SITE ESTIMATES IN CONTEMPLATION OF PROJECTS AND ONGOING WORK

TYPICAL FINAL HOURLY RATE FOR ONGOING PROJECTS

**\$37.50-\$50/hr**

**dependent on vehicle/equipment usage, project type, and number of hours. Rates are negotiable, this sales card wishes to leave no surprise to the consumer.**
